Paying for Child Care - Parent Aware  
Financial Aid Programs  
Child Care Assistance Program (CCAP)

## **Who**

Families may be eligible to receive CCAP benefits if:

- They have a low income. This includes families currently or recently in the Minnesota Family Investment Program (MFIP) and those who have never received cash assistance.
- They have children ages 12 and younger or children with special needs who are ages 14 and younger that need child care.
- They need help paying for child care to work, look for work, or attend school or training.

What

- This program pays a portion of families' child care costs to the family's child care provider.
- Families must use a legal provider. There may be a waiting list for assistance in some counties for families that haven't recently received cash assistance.

## **How**

- You can apply for child care assistance at your tribal or county human services office. Once you apply for CCAP, a child care worker will determine your eligibility and help you understand the program.
- For more information about the Child Care Assistance Program, visit the Minnesota Department of Human Services website.
